

COFFEE SHOP

Danyil Tymchuk NA
for MobileApp module

PART 1 –
CONCEPT
DEVELOPMENT:

Proposed Application:

The proposed application is an online marketplace for handcrafted and unique products. The target audience includes customers who appreciate handmade, artisanal items, and artisans who want to showcase and sell their creations. The application will consist of the following pages/modal windows:

- Home
- Product Listing
- Product Details (Modal)
- Cart (Modal)
- Checkout
- Login/Register (Modal)
- User Account

Navigation:

Users can navigate through the application using the header/navbar, which is present on every screen. They can access different pages (Home, Product Listing, User Account) and modal windows (Product Details, Cart, Login/Register) through navbar links and buttons. To go back, users can use the back button in their browser or click on the relevant navbar links.

Content on each screen:

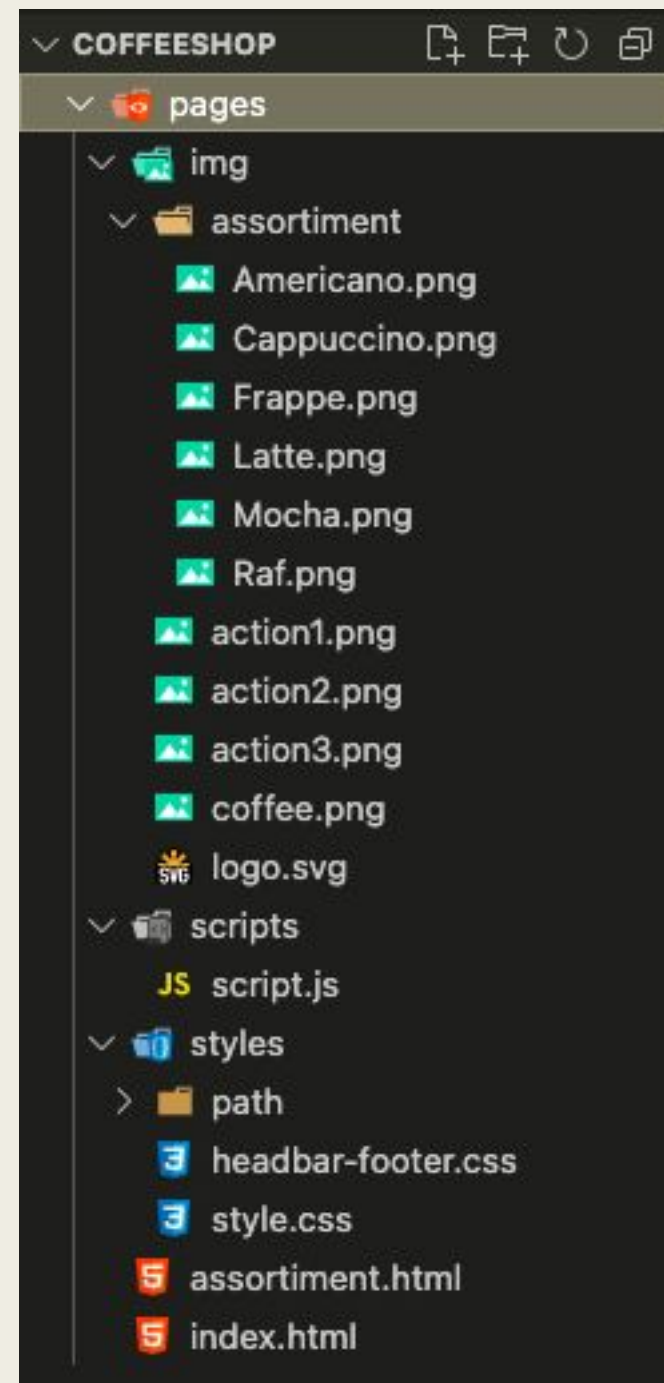

- Header/Navbar: Contains the logo, navigation links, and user account and cart buttons.
- Main: Contains the main content of the page (product listings, product details, forms, etc.).
- Footer: Contains links to additional information, contact details, and social media icons.

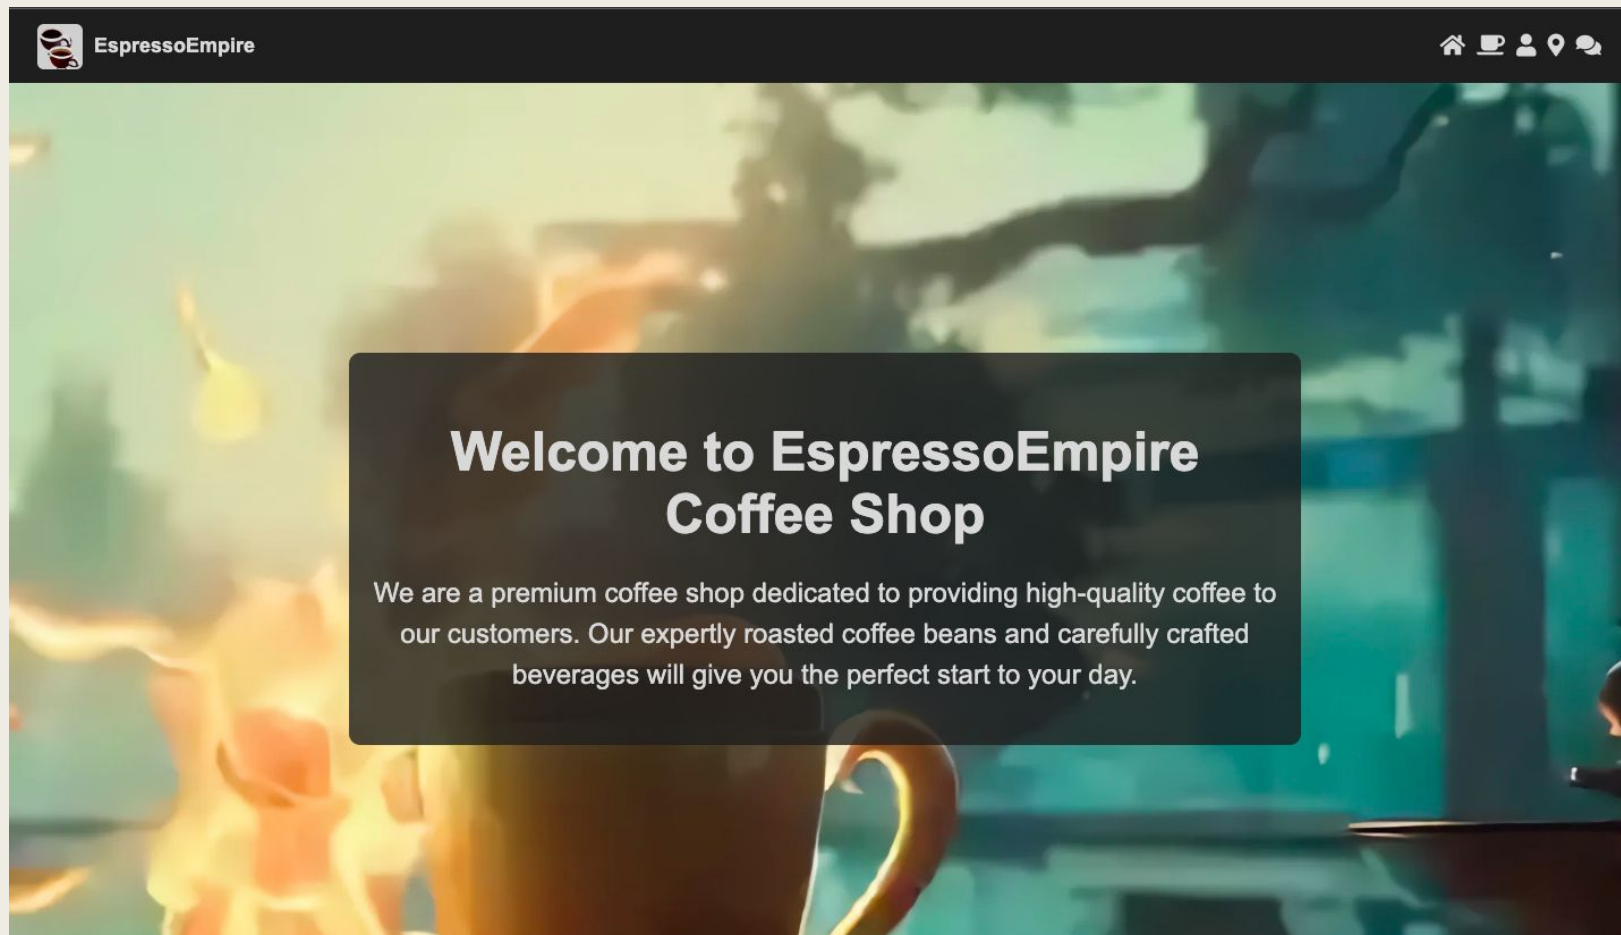

PART2 - DESIGN AND DEVELOP:

PART 3: PRODUCE A REPORT

Mobile Application Development Lifecycles for iOS and Android:

iOS:

- API: iOS SDK
- Development Language: Swift, Objective-C
- IDE: Xcode
- Cross-platform capabilities: Limited
- Installer file: .ipa
- Current OS: iOS 15
- Supported features: App Store, Core ML, ARKit, SwiftUI, etc.

Android:

- API: Android SDK
- Development Language: Java, Kotlin
- IDE: Android Studio
- Cross-platform capabilities: Limited
- Installer file: .apk
- Current OS: Android 12
- Supported features: Google Play Store, Material Design, Android Jetpack, etc.

User Interface Considerations:

- Clarity: Keep the interface simple and easy to understand.
- Consistency: Maintain consistency in design and functionality across the app.
- Feedback: Provide visual feedback for user interactions.
- Flexibility: Design the app to adapt to various devices and screen sizes.
- Efficiency: Optimize the app for quick and efficient usage.

Deployment Requirements:

- iOS: Deploy through the Apple App Store, available for devices with iOS.
- Android: Deploy through the Google Play Store, available for devices with Android OS.
